our products

Retractable, pleated flyscreens for doors and windows.

Simply Screens retractable, pleated flyscreens are offered in a wide range of colours and styles to blend into your existing property's colour schemes and designs. The unique design of the 'PLISSE' screens allow them to retract when not required, but come into play at a moment's notice when fresh air - not insects - is needed in your home.

They can be fitted anywhere in the home, requiring minimal space to install, but adding both comfort and value. The innovative design, installed in thousands of homes worldwide, are the 'solution of choice' for interior designers, builders, architects - and importantly - people like you, who appreciate your home and all its comforts.

Superior technology and innovative design has allowed the Flyscreen to evolve from just a functional product to now enhance and compliment the beauty and comfort of your home. SimplyScreens brings that technology and design to Portugal.

The aim of SimplyScreens is to provide it's customer with a superior, top quality, high end product at a competitive price. Backed by an informed, highly professional, Sales Team with fully trained and experienced Fitters, the service we offer guarantees a quality, efficient, clean and punctual installation with excellent Customer Service.

overview

Doors, windows, french doors & sliding patio doors - we have a solution for each:

Plisse

The pleated retractable door screen without a bottom rail, from SimplyScreens. Let the fresh air in and keep insects out with Italy's leading retractable flyscreen. The Plisse screen can be used with French doors, sliding Patio doors and ordinary hinged doors, and provides an effective means of circulating fresh air whilst maintaining privacy and protecting against insects.

Specific Plisse Features are:

- Very flexible, with multiple configurations, from singular units to multiples (max 6) for very wide openings (as pictured).
- Patented lower door fixing offers no floor barrier, makes cleaning easy, and allows door to absorb impact, so avoiding damage.
- Can be fitted into openings that do not have perfectly square walls.
- A low profile frame allows the unit to be used with Security shutters and screens.

MiniPlisse

MiniPlisse is a horizontal retractable, pleated flyscreen with overall dimension of only 32mm (frame), so allowing installation on virtually ANY type of window. The fixing system is ideal for both frontal or lateral application on/in the frame and compliments the Plisse range when used specifically for windows.

gioconda

Gioconda vertical /
Gioconda horizontal

Gioconda

Gioconda is a versatile retractable, pleated flyscreen system that can be fitted in windows or patio doors, sliding or French, such that the pleats and movement can be either vertical or horizontal dependent upon user preference.

The flyscreens can be either clutch operated, maintaining a partially open configuration if required (vertical and horizontal options), or chain operated when installed in the horizontal version, typically for large windows.

Additionally the horizontal version can be specified with an operations stick with a 180 degree rotation to make opening and closing easier.

The construction is based on a rigid frame and track system, both top and bottom. This provides a more robust solution for larger openings or ones where the location is more susceptible to windy conditions.

pratika

Pratika fixed
fly screen

Simply screens
mosquito screens with style

Pratika

Pratika is a fixed fly screen option where retractable screens may not be required i.e, bathrooms etc.

The Pratika comes with three fitting options:

- The 'Permanent' option. The screen is securely screwed into surrounding frame/brickwork with a wall bracket.
- The 'Removable' option. The screen is held in place with magnetic fittings and fixed laterally within the window opening. This allows for easy cleaning for both window and screen.
- The 'Coccinella'. As the 'Removable' option but using unique 'twist clip' fittings that are fixed to the front of the frame/brickwork.

General features
and construction

Simply screensS
mosquito screens with style

General features

- Offers an effective and attractive flyscreen solution for protection against insects.
- Profile is unobtrusive and compliments your existing door opening.
- Retracts out of sight when not in use.
- 2 choices of screen colour (black and grey) and 28 different frame finishes allows you to choose the design to compliment your existing décor.
- Patented spring tension system holds the screens taught.

Construction

- Pleats manufactured by a patented process carrying a guarantee against splitting.
- Mesh comes in black or grey for insect protection made from PVC-coated mesh to avoid fading (black net is sold as standard. If Grey net is required this must be stated at time of order).
- Alternate configurations allow for darkening or UV-protection.
- Frames and housing made from high quality extruded aluminium.
- Finished in acrylic to prevent chipping and scratching.
- Assembled and fitted on site by experienced professionals guarantees a punctual, clean, quality installation.

finishes

The aluminium frames can be supplied as solid colours (9 options), Marbled (7 options) or Wood Grain (12 options). Details and samples can be provided on request.
