plissé (patented)

The evolution of flyscreens...

Plissé is the ideal flyscreen for wide french doors. The absence of lower guides on the floor makes for very easy cleaning and transit: no architectural barrier.

It can be realized with one shutter, two shutters with central closing hook or even "one after another" system from two to six shutters for very wide doors.

No barrier on the floor >

6 shutter plissé

Lateral compensating profile

To fix the flyscreen on uneven jambs it is advisable to use the compensating profile. The screen can be easily unhooked.

Size and colour options:

Plisse doors can be fitted as one screen or multiple screens. When fitted as multiple units, the locking mechanism can be 'Central' or 'one after the other', for very wide doors.

Door heights, for all module widths can be from 210 cms to 270 cms.

Plisse Screens come in two finishes, black or grey, for flyscreens.

They may also be supplied with a Plated Darkening finish, or Filtering in 4 colours.

Frames can be supplied as solid colours (9 options), Marbled (7 options) or Wood Grain (12 options). Details and samples can be provided on request.

Number of door modules:	Width of opening:		
01	90cm	-	190cm
02	180cm	-	380cm
03	270cm	-	570cm
04	360cm	-	760cm
05	450cm	-	950cm
06	540cm	-	1140cm
